EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claims 7-15 **CANCELLED**

Reasons for Allowance

2. Claims 1-6 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious all the limitations in independent claim 1, specifically the combination of a semiconductor component with trench isolation for defining active regions in a semiconductor substrate, the trench isolation comprising:

a deep isolation trench with a first covering insulation layer below a surface of the semiconductor substrate and a second covering insulation layer over the first covering insulation layer and above the surface of the semiconductor substrate, a gate oxide layer over a surface of the second covering insulation layer, a side wall insulation layer, an electrically conductive filling layer, which is electrically connected to a predetermined doping region of the semiconductor substrate in a bottom region of the isolation trench and wherein the first covering insulation layer is over a top surface of the electrically conductive filling layer; and

further comprising:

a trench contact which comprises: a deep contact trench with a side wall insulation layer and an electrically conductive filling layer which is electrically, contact-connected to the predetermined doping region of the semiconductor substrate in a bottom region of the contact trench; a trench contact insulation layer above a surface of the electrically conductive filling layer;

a contact opening through the trench contact insulation layer and in contact with a top surface of the electrically conductive filling layer and,

wherein a composition of the electrically conductive filling layer that is electrically, contact-connected to the predetermined doping region of the semiconductor substrate in a bottom region of the contact trench is the same as a composition of the electrically conductive filling layer having a top surface in contact with the contact opening

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The following patents and published patent applications are cited to further show the status of the art with respect to trench isolation regions.
